

Technical vehicle data (TPERAP009)

General provisions

The data retrieved from the information service in technical data extraction contains vehicle identification and technical data. In addition to vehicle identification data, the data does not contain personal data.

The data can be used as such or it can be used as a basis for an enquiry service for consumers or companies. The data can, for example, be used in information services for spare parts sales.

The dataset contains vehicles with first-time registration that belong to vehicle categories M, N, L, O or MA and have not been finally deregistered.

Data deliveries and prices

The dataset will be supplied to a broker service four times a year. The broker service is provided by Traficom's system supplier. A one-off basic charge is payable for the first data delivery. The charge is service-specific and will be invoiced separately for the services intended for consumers and companies.

Traficom will invoice dataset-specific fees in accordance with the price list valid at the time (batch extractions from the register). The broker service provider will invoice the costs arising from the brokerage agreement.

Terms and conditions of use

The service is subject to terms of use. The partner must have a valid agreement and a data access authorisation with Traficom and a brokerage agreement with the broker service provider. Contact Traficom for instructions on matters concerning brokerage agreement.

Further information

There is also application interface for queries concerning vehicles (technical data). The invoicing is based on the number of application queries and is in accordance with the price list valid at the time (application queries). You can also use open vehicle data available free of charge. For more information, contact www.traficom.fi

For enquiries, contact tietojenluovutus@traficom.fi

Data content

- registration number
- vehicle identifier number
- vehicle category
- the make of the vehicle (code value)
- the make of the vehicle in plain text
- model
- commercial name
- vehicle classification
- type identification number
- variant
- version
- type code
- date of entry into service
- name of manufacturer
- imported individually
- number of axles
- transmission
- type of bodywork
- driving power
- engine displacement
- maximum net power
- engine identification
- supercharger
- exhaust emission
- control device
- tare weight
- maximum permitted technical total mass
- maximum permitted total mass in road traffic
- trailer masses
- total vehicle length
- axle data
- tyre data for each axle
- special conditions (only tyre information)
