

## Application interface for queries concerning vehicles, watercraft and right to drive

### General provisions

Traficom's partners/service providers may provide enquiry services based on Transport Register data for the use of private individuals and companies.

Queries on vehicle and watercraft owner and holder data as well as on technical data can be made to the Transport Register on the basis of the registration number and/or the vehicle identification number. Queries on the right to drive and professional qualifications can be made on the basis of the personal identification code. If the person in question has a valid information disclosure prohibition, the data covered by the prohibition cannot be disclosed.

Public individual enquiry services for consumers can be provided as internet, text message and/or mobile services.

A service for companies can be based on the data kept in the Transport Register and data belonging to the service provider. Service end users may include car dealers, car repair shops, vehicle inspection and towing companies, financing companies and other transport-related parties.

A broker service is used for supplying the data. The broker service is provided by Traficom's system supplier.

### Terms of use and pricing

The service is subject to terms of use. The partner must have a valid agreement with Traficom, a data access authorisation and a brokerage agreement with the broker service provider. Contact Traficom for instructions on matters concerning brokerage agreement.

Traficom will send the service provider an invoice for the service each month. The invoicing is based on the number of application queries and is in accordance with the price list valid at the time (application queries). The broker service provider will invoice the costs arising from the brokerage agreement.

The service provider must obtain a Traficom data access authorisation for each company using the service.

### Further information

Register enquiry services are provided by Traficom's partners, whose addresses are available at [www.traficom.fi](http://www.traficom.fi)

The technical documents concerning planning and implementation of the service will be sent to the service provider after Traficom has processed the application. For enquiries, contact [tietojenluovutus@traficom.fi](mailto:tietojenluovutus@traficom.fi)

## Data content of the query categories

### Brief vehicle description

- vehicle data (e.g., make, model, vehicle category, inspection data, etc.)
