

Annual report on content moderation pursuant to the DSA

1 Grounds for moderation

The Finnish Transport and Communications Agency has acted on the basis of section 172 of the Act on Electronic Communications Services (2014/917) interpreting the cases to constitute significant information security violations.

All cases in which domain names were subject to moderation concerned the use of the domain names in phishing schemes to obtain online banking credentials.

2 Number of moderation measures

In 2024, 17 decisions were issued under section 172 and the required moderation measures were implemented.

3 Moderation measures

Name servers were removed from the domain names subject to moderation. As a result, the websites used to phish for online banking credentials stopped working.
